I-Novelty:

Claim 1 of the present invention is concerned with colored flame fuel composition comprising coloring agent, alcohol and/or amine-containing fuel or fuel mixture, additive with ester bond and fire power enhancer having at least 3 carbons. Although D1 cited in the international search report discloses colored flame fuel composition, the presence of additive with ester bond is not described in D1. And also, D2-D4 cited in the international search report do not refer to colored flame fuel composition comprising fire power enhancer having at least 3 carbons. Accordingly, the subject matter of claim 1 seems to be novel.(PCT Article 33(2)). Claims 2-6 also comply with PCT Article 33(2) as they are dependent claims. Another independent claim 7 must be novel, because it is a device for colored flame comprising components of claim 1 having novelty.

Continuation of:

V.

II-Inventive step:

1) Concerning claim 1 (Independent claim)

The references D1-D4 do not disclose colored flame fuel composition comprising fire power enhancer having at least 3 carbons. In addition, the content of each component said documents is different from that of claim 1. And also, it is not obvious from the references D1-D4 by the skilled person in the art. Consequently, there is no suggestion in any of the references, either alone or in combination, which would lead to the solution posed by the present invention. Therefore, claim 1 of the present invention meets the criteria set out in PCT Article 33(3).

2) Concerning claims 2 to 6 (dependent claims)

claims 2-6 also comply with PCT Article 33(3) as they are dependent claims.

3) Concerning claim 7 (Independent claim)

Claim 7 of the present invention meets the criteria set out in PCT Article 33(3), because it relates to a device for colored flame comprising components of claim 1 having inventive step.

Claims 1 to 7 meet the criteria set out in PCT Article 33(4), because they are directed to an industrially applicable colored flame fuel composition.
